

Assessing for Technology- Facilitated Violence and Privacy Concerns for Anti-Violence Workers

BEST PRACTICES FOR ORGANIZATIONS

Women and children experiencing violence may be victims of technology-facilitated violence and their safety and privacy may be compromised in the way that their personal information is shared or monitored. As anti-violence workers, it is imperative that we take the time to educate ourselves and our residents and program participants about the various ways stalking, tracking and monitoring through technology happens.

The following information will help you and the women you support think through how to narrow down technology misuse by the perpetrator so you can properly safety plan. The questions are only meant to quickly assess what might be an issue and is not meant to be an exhaustive list of all technology-related safety concerns a woman might face. Anti-violence workers should follow up with a more thorough conversation about each woman's specific concerns and discuss strategies to increase safety, document incidents, and get additional help. Keep in mind that women often attend support groups with little direct and ongoing interaction with anti-violence workers, so consider incorporating this information as a support group topic as well.

STEPS TO ASSESSING TECHNOLOGY MISUSE & SAFETY

- *Prioritize safety planning:* What are your current safety concerns?
- *Narrow down the possible technology that could be used:* What types of things have happened to make you feel unsafe or cause concern?
- *Gauge women's knowledge and understanding:* How do you think this is happening?

These questions open a conversation that will explore and prioritize safety, discusses what types of technology devices or applications could be misused, and how to best safety plan to address their needs and further their knowledge.

Below are sample questions and possible technology misuses to get you started, once you've narrowed down what may be happening:

1. Are you concerned about the perpetrator knowing where you are all the time? Let's explore some common ways tracking can occur.
 - Through your smartphone.
 - Through applications on your phone that use your location.
 - Through social media.
 - Through friends & family.
 - Through your car or some kind of tracking device on the car.

2. Are you worried that the perpetrator might be able to access your communication with other people? Let's explore some common ways communication can be compromised.
 - Email communication.
 - Smartphone communication.
 - Phone communication.
 - Other types of communication.

3. Are you concerned about information that's posted about you online? Let's look at possible ways information about you could be shared online.
 - Through social media accounts that you have.
 - Through social media accounts that the perpetrator has.
 - Through your children/family/friends' social media accounts.
 - What specifically is your concern around those accounts? [Example: The perpetrator is posting terrible things, monitoring social media accounts to find information about you or accessing online accounts without your permission.]
 - Is there other information online about you that you are concerned about?

4. Are you concerned about your children/family/friends' use of technology and the possibility it could compromise your safety?
 - Are they using specific applications on their smartphones, iPads, tablets, etc. that you're concerned about?
 - Are there games that they are playing that you're worried about?

5. Are you concerned about your ability to continue using technology while maintaining your safety and privacy?
 - Are there specific technology devices, such as your smartphone or your laptop that you want to go through to ensure that it is safe and secure?
 - Do you need to go through your social network accounts to figure out privacy and security settings?

6. What are other concerns that you have about your privacy and safety?
