

# Infographic: Technology, Disability, & Gender-Based Violence

## Accessibility, Assistive Tech, & Inclusion Toolkit

An abuser might misuse technology to harm or control a survivor with a disability (TFGBV)

An anti-violence program might use technology strategically to increase program accessibility and support survivors with disabilities

Lack of suitable technology might be a barrier for survivors leaving abusive situations

For the full toolkit, visit BCSTH's [Accessibility, Assistive Tech, & Inclusion page](#).
